

Suncorp Bank Integrated POS

EFTPOS integrated with your Point of Sale (POS) system

Integrated POS explained

Suncorp Bank's Integrated POS is an EFTPOS terminal that is integrated into the merchant's POS system*, and enables detailed reporting via an EFTPOS Management System (EMS).

Who it's for

- Merchants processing large volumes of transactions.
- Merchants with multiple checkout lanes, such as supermarkets or service stations.
- Merchants with a single checkout can also benefit from automated stock control and accounting system updates.

What it offers

- Daily settlement, if to a Suncorp Bank Business Premium Account, seven days a week, which means you can use your cash the next day.**
- Easy-to-read monthly merchant statements.

How Integrated POS works

- Step 1.** To process a transaction, the merchant enters the sale into the POS screen on the cash register.
- Step 2.** The software communicates direct to the PIN pad, preventing the merchant from having to enter the transaction into both a cash register and an EFTPOS terminal.
- Step 3.** The cardholder completes the transaction by confirming the amount shown on the PIN pad screen, and either enters a PIN for a debit card transaction or selects "OK" for a credit or charge card transaction, in the same way that a transaction is completed using a standard EFTPOS terminal.
- Step 4.** On completion of the sale, the merchant's accounting system (POS software) is updated by the Integrated POS software.

Merchants are able to process the following transaction types using Integrated POS:

- Purchase.
- Refund.
- Purchase with cash out.
- Totals and settlement.
- Cash out.
- Settlement.

Merchants are able to process the following card types using Suncorp Bank's EFTPOS:

- All major credit and debit cards (Australian and international).
- American Express and JCB (subject to successful application and approval from American Express).
- Apple Pay, Google Pay, Samsung Pay and other "Pays".
